

**COMBI**

## Combi

### Details:

The Combi model consists of the combination of several types of packaging. Specifically, it is able to pack in wrap-around, with high tray and with tray + film. With this machine, it is possible to package almost all types of products, as it covers a wide range of packaging options. It is a particularly useful machine for producers that cover more than one production line, with different needs for each type of product that requires packaging.

## Saving energy tunnel

- ▶ Tunnel flow setting through adjustable holes
- ▶ Extra resistors already installed (zero downtime replacement)
- ▶ Minimum energy consumption
- ▶ Three possible configurations on the same tunnel (1, 2 or 3 lanes)
- ▶ Separate cooling section at the exit for best shrink
- ▶ Tunnel adjustment according to the film characteristics
- ▶ Possibility of working with different types of films by adjusting the air flows and temperature
