

SHRINK WRAPPERS

Shrink Wrappers

OVERLAPPING OR **SEALING BARS**

A wide range for every packaging needed. Bottles, cans, bricks, clusters and boxes in film only, flat pad + film, tray + film.

OUR POINT OF STRENGTH THAT MAKES THE DIFFERENCE

Cantilever frame makes the operator side free from moving parts..
On the opposite maintenance side there are all the mechanical, electronic and pneumatic part, always visible to allow an easy maintenance

Sealing Bar

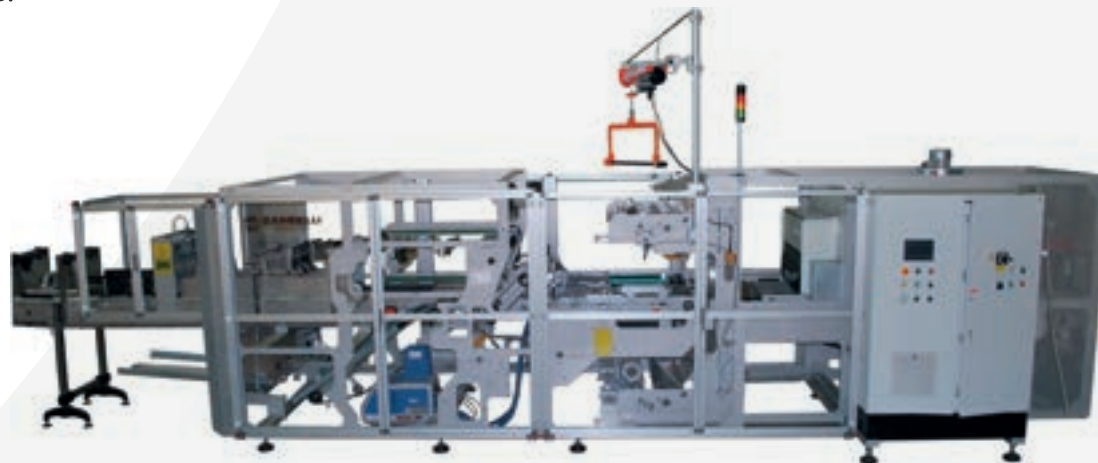

Step

- 1 The welding bar system welds the film coming from two reels. The oven will then shrink it around the product.
- 2 A pneumatic cylinder pushes the product composition beyond the sealing bars, wrapping it during the passage. The closing of the bars then carries out the welding.
- 3 The temperature of the sealing bars is electronically controlled and the closure movement is pneumatically driven. The film cutting operation is carried out within the bars by high temperature.

Packaging

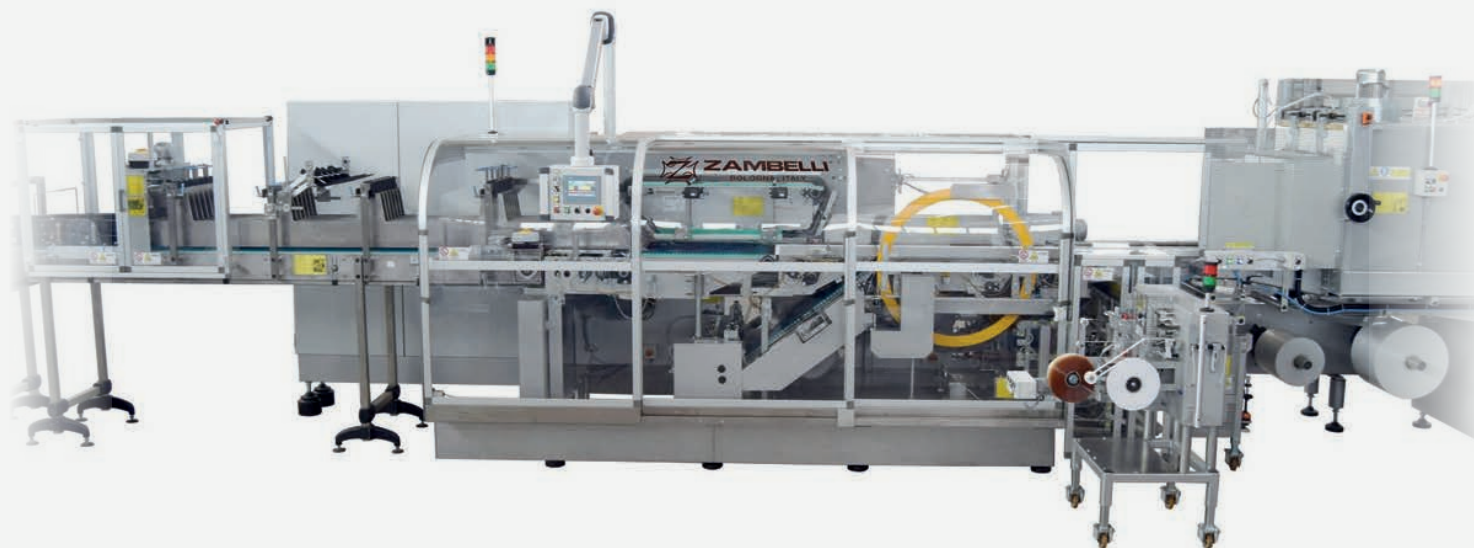

Sealing bar for film only

Sealing bar for film + in-line tray

LFT Shrink Wrappers

ONLY FILM

Details

The LFT Film only model is available in single, double and triple lanes.

It can package all products characterized by good stability and low risk of damage, including plastic bottles, food cans, beverage cans, clusters and boxes.

The products will be protected from external agents, easy to store and transport and visually pleasing if displayed on store shelves.

LFT Shrink Wrappers

WITH PRE-SHRINKING HANDLE APPLICATOR

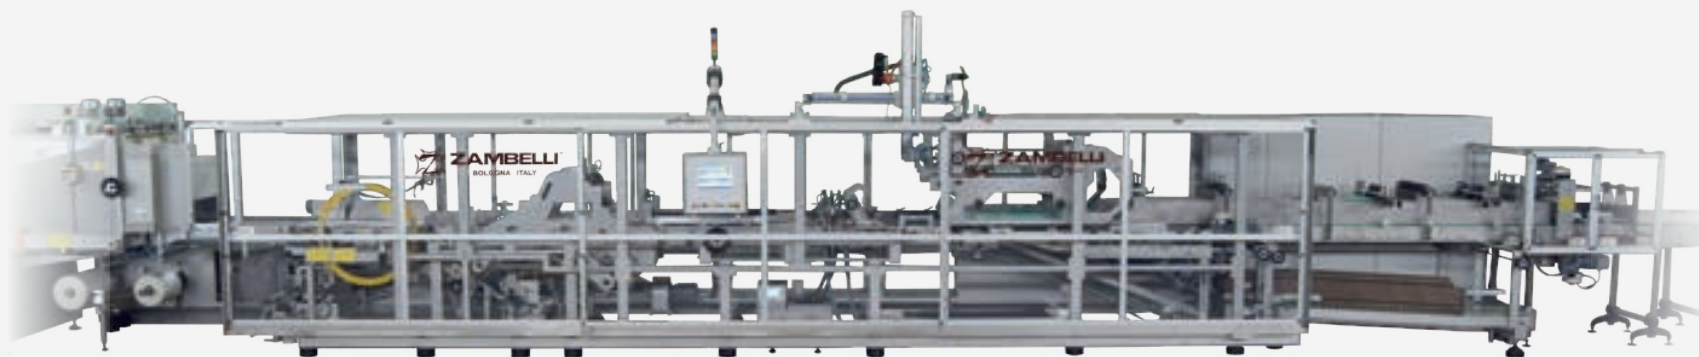

Details:

The LFT model with pre-shrink handle applicator* [Special Assemblies for shrinkwrappers "Single and double pre-shrink handle applicator"] is available in single and double lane versions.

The applied handles are resistant and comfortable for transport by the final consumer.

LFT Tray + Lid Model

TRAY WITH TRAY STACKER AND LID

Details

The LFT tray model is available in single and double trays, in flat pad and in film-only. It can pack all products, even those with particularly sharp edges, thanks to the addition of a tray or a flap that protects and acts as a base for the film.

The products do not run the risk of damage to the outer packaging and are equally protected from atmospheric agents, making them easy to store and transport and being visually pleasing when displayed on store shelves.

Two devices in particular are integrated in this model: the tray stacker and the lid inserter.

LFT Shrink Wrappers

TRAY

Details:

The LFT tray model is available in single and double trays, in flat pad and in film-only.

It can pack all products, even those with particularly sharp edges, thanks to the addition of a tray or a flap that protects and acts as a base for the film.

The products do not run the risk of damage to the outer packaging and are equally protected from atmospheric agents, making them easy to store and transport and being visually pleasing when displayed on store shelves.
